Drucker on Asia is written in two parts (Times of Challenge & Time to Reinvent) which is the result of a dialogue between Peter Drucker and Isao Nakauchi on international themes. Drucker On Asia is the result of extensive dialogue between two of the world's leading business figures, Peter F Drucker and Isao Nakauchi. Their dialogue considers the changes occurring in the economic world today and identifies the challenges that free markets and free enterprises now face with specific reference to China and Japan. * What do these economic changes mean for an individual country and its economy? * What do these changes mean to Japan? * What do these changes mean to society; the individual company; the individual professional and executive? These are the questions that Drucker and Nakauchi address in their brilliant insight into the future economic role of Asia.

In today's technology-crazed environment, distance learning is touted as a cost-effective option for delivering employee training and higher education programs, such as bachelor's, master's and even doctoral degrees. Distance Learning Technologies: Issues, Trends and Opportunities provides readers with an in-

depth understanding of distance learning and the technologies available for this innovative media of learning and instruction. It traces the development of distance learning from its history to suggestions of a solid strategic implementation plan to ensure its successful and effective deployment.

The Future of Industrial Man is the only book by Peter Drucker in which he systematically develops a basic social theory. He presents the requirements for any society to be functioning and legitimate, and then applies these general concepts to the special case of the industrial society. In his new introduction, Drucker explains that his reference to mercantilism in The Future of Industrial Man can today be called neoconservatism, which, he asserts, denies rather than affirms the reality of industrial and postindustrial society. Drucker outlines the major shifts of previous centuries. He describes the move from an agrarian to an industrial economy, illustrates the structure and dynamics of this new industrial order, and warns of the abuses inherent in the system if attempts are made to maintain it under anachronistic social conventions. He emphasizes the fact that the new industrial order must operate under a "legitimate" system of political power supported by social authority. He discusses the particular roles of the owners, the workers, the managers—the corporation itself—as he pinpoints the problem that he considers the most central and the most critical: how to maintain the continuing freedom of the individual in an increasingly intricate, bureaucratized world. Following the initial publication of this work, Jacques Barzun wrote in The New Republic, "Here is a book which is so perfectly planned and so transparently written as to read with almost indecent ease. . . . Each page is the fruit of much learning and long reflection. It should accordingly be studied, pondered over, analyzed word by word." According to W. H. Chamberlain of The Atlantic Monthly, "[Drucker] possesses a fund of historical and economic knowledge." The Future of Industrial Man is a landmark study by a noted analyst of the modern corporation. It is of continuing importance to economists, industrial studies scholars, and profes-

sional

This text uses the theory of the firm to integrate and link economic theory (microeconomics and macroeconomics), decision sciences (mathematical economics and econometrics), and the functional areas of business (accounting, finance, marketing, personnel or human resource management, and production) and shows how all of these topics are crucial components of managerial decision making. The text is divided into five parts-Part I examines the nature and scope of managerial economics, Part II analyses demand, Part III presents the theory and measurement. It covers the full range of optimization techniques used in managerial decision making. The book offers extensive end-chapter material in the form of the summary, discussion questions, problems, chapter appendixes along with appendix problems, supplementary readings, and Internet site addresses. This seventh edition includes new sections, new case studies, some of which are India based, and five new longer Indian integrated case studies. In addition, the existing case studies, supplementary readings, and Internet site addresses have been revised.

The Age of Discontinuity: Guidelines to Our Changing Society describes the discontinuities that are changing the structure and the meaning of economy, politics, and society. Major discontinuities exist in four areas: the knowledge technologies; changes in the world's economy; a society of organizations; and the knowledge society. This book is organized into four parts encompassing 17 chapters. Each part represents the four areas of discontinuities. Part I highlights the growth in major industries and businesses, along with economic policies related to tax incentives. Part II looks into the status of the global economy, the disparity

between the rich and poor countries, and the concepts and application of the economic theory demonstrating a closed economy controlled from within by national, monetary, credit, and tax policies. Part III examines the changes in the political matrix of social and economic life. This part deals particularly with the theory of pluralism and organizations, as well as the creation of socio-political reality. Part IV focuses on the changes in the cost center and the crucial resource of the economy. Knowledge changes involve changes in labor forces and work. This book will prove useful to economists, public servants, sociologists, and researchers.

Senge's best-selling *The Fifth Discipline* led *Business Week* to dub him the "new guru" of the corporate world; here he offers executives a step-by-step guide to building "learning organizations" of their own.

With forty well structured and easy to follow topics to choose from, each workbook has a wide range of case studies, questions and activities to meet both an individual or organization's training needs. Whether studying for an ILM qualification or looking to enhance the skills of your employees, Super Series provides essential solutions, frameworks and techniques to support management and leadership development.

Centuries after the destruction of Earth, destiny is being fulfilled and plans are in motion to restore not only the Earth, but mankind, to its former glory. One family is fated to bring about this amazing destiny. One man puts it all in motion, the day he crashes onto the wolf-planet of Tumaró and meets his mate. Talon Versuthion always knew that some kind of way, life was going to screw him over. His parents died when he was just a boy and he can't remember a thing about them. He was adopted by a great family only to have them tell him that he is a Vermithian, one of the most despised humanoid species. Even worse than that? He

has no idea that a prophecy was made about his family, one that mentions that someone from the Versuthion family will bring back a pure human race. And there are people out there who will stop at nothing to make sure that never happens. No matter what. While on a delivery for the GPA with his adopted sister Josie, however, Tal's space shuttle crashes onto Tumaro, the notorious wolf-shifter planet. Tal is lucky to be alive, though Josie can't be found. He is desperate to find her, but destiny steps in and history is changed forever. Because the Alpha King of the planet, Blazell Roughshire, is Talon's mate. And before the two men can even settle into their new relationship they must deal with conspiracy, murder, kidnapping and a centuries old plot to completely eradicate the human race. Will Blaze be able to keep his mate safe from those who would see him dead? Is Tal truly the only one left from his family who can fulfill this centuries old prophecy? And can Tal, who has made it a point to never fall in love with anyone, open his heart and let Blaze be Passion's hero?
