Uses an ongoing legal controversy to explore the controversial subject of religious liberty and education.--Frederick M. Hess, director of education policy studies at the American Enterprise Institute

Washington State has a rich history. Known for its stunning natural beauty and diversity, Washington was populated for centuries by a large number of Native American tribes. Explored by British sea captains in the late eighteenth century, the region was opened in the early nineteenth century with the aid of explorers Lewis and Clark. With the coming of the railroads, cities such as Seattle, Tacoma, and Spokane grew rapidly, while other communities sprouted up around the state. From coal mining in King County and logging in the deep forests, to farming in the Palouse and fishing on the Columbia, everyday men and women attempted to carve a living. With a selection of fine historic images from his best-selling book, *Historic Photos of Washington State*, Dale E. Soden provides a valuable and revealing historical retrospective on the growth and development of Washington State. Selected from several archival collections, these photographs include a number of images from two of Washington's best-known photographers, brothers Edward and Asahel Curtis. Published in striking black-and-white, *Remembering Washington State* reveals the history of what has become one of the most intriguing states in the nation.

Serial meets Ruth Ware's *In A Dark, Dark Wood* in this inventive and twisty psychological thriller about a mega-hit podcast that reopens a murder case—and threatens to unravel the carefully constructed life of the victim's daughter. The only thing more dangerous than a lie...is the truth. Josie Buhrman has spent the last ten years trying to escape her family's reputation and with good reason. After her father's murder thirteen years prior, her mother ran away to join a cult and her twin sister Lanie, once Josie's closest friend and confidant, betrayed her in an unimaginable way. Now, Josie has finally put down roots in New York, settling into domestic life with her partner Caleb, and that's where she intends to stay. The only problem is that she has lied to Caleb about every detail of her past—starting with her last name. When investigative reporter Poppy Parnell sets off a media firestorm with a mega-hit podcast that reopens the long-closed case of Josie's father's murder, Josie's world begins to unravel. Meanwhile, the unexpected death of Josie's long-absent mother forces her to return to her Midwestern hometown where she must confront the demons from her past—and the lies on which she has staked her future.

In *Learning with Information Systems* the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.
